

The Bold Group has been providing total business solutions for the security industry for over four decades. Our core products, Stages, ManitouNEO, Sims, SedonaOffice, and AlarmBiller are the leading software choices for over 1000+ top security companies and dealers globally.

AlarmBiller® powers Security dealers through our cloud-based, paperless, secure alarm billing software to keep track of appointments, invoices, work orders, proposals and payments.

30%

“Of the industry is investing in digital transformation that will be able to maximize outcomes”

<https://www.mbtmag.com/article/2018/06/how-digital-transformation-impacts-manufacturing-industry>

Dependent on Spreadsheets

Is Excel your go-to for complex tasks like billing?

Scattered Schedules

Is it tough to keep track of technicians' schedules?

Missed Billings

Are invoices late or missed due to human error?

No Field Payment

Do technicians struggle to collect payments in the field?

Outdated System

Is your software inflexible due to outdated technology?

Generic Features

Does your software lack security-specific functionality?

Non-Centralized Information

Does it take multiple software's to manage your business?

Paper Service Tickets

Are you still using paper service tickets which get lost and delay invoicing?

Wasted Time

Does it take a day or more to get invoices out the door?
