

Business Process Management

**Automate, Integrate,
and Optimize Processes**

Automate repetitive workflows to reduce manual effort, minimize errors, and improve operational efficiency across departments.

Seamlessly integrate business systems to enable real-time data sharing, enhance visibility, and improve decision-making.

Optimize end-to-end processes by streamlining operations, increasing productivity, and ensuring consistency across all business functions.

Automate document generation and delivery to streamline reporting, invoicing, and communication while ensuring accuracy and timely distribution.

The Future of Business Process Management

Powerful Automation, Simple to Use

OxyGen is designed for efficiency and flexibility, offering a low-code, modular platform that adapts to your business needs. With its intuitive drag-and-drop interface, users can automate complex workflows, integrate systems, and manage data without deep technical expertise. Features like the Visual Email Template Editor and SQL Query Builder make it easy to create professional emails and extract key insights without coding. OxyGen provides ease of use with the power to handle sophisticated automation and business logic.

Advanced Logic Engine & Data Transformation

OxyGen's powerful logic engine and data transformation module enable businesses to automate complex decision-making and data processing. Its low-code interface allows users to apply conditional logic, perform calculations, and manipulate data across systems without the need for technical configurations. Whether transforming raw data into insights, streamlining workflows, or integrating applications, OxyGen delivers the flexibility to automate diverse processes while maintaining simplicity, speed, and accuracy.

Seamless Data Connectivity Across Platforms

OxyGen supports multiple data connectivity options, including universal database support via ODBC, REST API, Web Hook reception, and Flat File ingestion. These integrations enable seamless data exchange, ensuring businesses can efficiently connect, process, and automate workflows while maintaining data accuracy and real-time accessibility.

End-to-End Workflow Automation

OxyGen connects processes across departments and external partners, bridging gaps between systems. An intuitive, visual interface delivers transparency at every step, enabling collaboration, accuracy, and speed. Finance, operations, and customer service remain seamlessly integrated for end-to-end efficiency.

BPM Meets iPaaS

Born from extensive experience in business automation, OxyGen evolved beyond typical BAM tools to address the unique needs of small and mid size organizations. By unifying process (BPM) and integration (iPaaS) capabilities in one modular, scalable platform, OxyGen eliminates complexity, streamlines key processes, and reduces IT overhead. Its visual-first design fosters rapid adoption, empowering teams to manage workflows and integrations without heavy development resources. The result is a powerful yet affordable solution for modern business process automation.
