

# Re-Invoicing RMR Thru a Job in SedonaOffice

12/29/2023 12:40 pm EST

When a job is invoiced, if the job includes RMR, this is what writes the RMR line to the customer record.

If there's something wrong and the job has to be re-invoiced, those RMR lines do not get added to the invoice.

If they did, it would lead to duplicate RMR lines on the customer account. The user will have to invoice the RMR separately.
