

SedonaCloud Licensing for Sedona-X Mobile - 2022

01/05/2024 6:14 pm EST

Deploy 1.25.1+ of SedonaCloud

We should have IT deploy version 1.25.1 or higher of SedonaCloud to either the customer's on-premise environment or cloud-hosted environment via Octopus. You will also have to ensure that IT has set the AppPoolIdleTimeoutMinutes option to 0. This will ensure the customer does not have any speed/lag issues when connecting to SedonaCloud

Create a new SedonaCloud license with Sedona-X Mobile enabled

1. To create a new license, please go here
 - a. <http://sedonacloudlicense.perennialsoftware.com:6579/License/LicenseGenerator>
2. Enter Perennial123\$ into the Signature input and click "Create" to generate a new Private and Public Key
 - o Paste the following Private Key
 - Private Key:
MIICITAJBgoqhkiG9w0BDAEDMBUEEFWRCo389ISpWLwYco44etsCAQoEggH4X+MEH2s+oGwWT4Uh1+oNvklUlcB1l6QoJzu41WbuBQ57QzmhvDHks26iY+NjiOEwVz
 - o The expiration Date should be today but the year should always be 9999
 - o License to Name should be Company Name
 - o License to Email should be the authorizing contact
3. Enter the Max Sedona Companies for Customer
 - a. Usually set this to 99 if there is nothing special outlined in the sales contract
4. Enable Sedona-X Mobile
 - a. Set the max sold number of Sedona-X Mobile users
5. Click Create

Keep your browser tabs open as you move to the next step

Add New License to SedonaCloud

1. Login to the Host Portal of SedonaCloud
2. Click on the "Preferences" link in the top navigation
