

# Warehouse vs Technician Mode in Sedona Scheduler

05/31/2024 9:13 am EDT

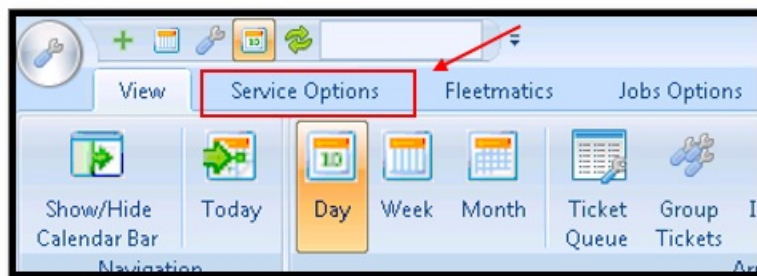

## Warehouse vs Technician Mode in Sedona Scheduler

If a Tech tries to add a New Part to a Service Ticket and the only option is to select a Technician and not a Warehouse then “Technician” Mode is selected in the Sedona Scheduler.

If the Tech adds a New Part and the Warehouse option is available then the “Warehouse” Mode is selected.

## Sedona Scheduler

In the Scheduler, select the “Service Options” Tab.

On the “Parts Warehouse” there are two options – “Warehouse” and “Technician.”

When the “Warehouse” option is selected this will allow Techs to choose which Warehouse to pull parts from when added on a Service Ticket.

When the Tech goes to the "Equipment and Parts" Tab

The screenshot shows a table with the following columns: 'Stock', 'Warehouse', 'Part', and 'Description'. The 'Warehouse' column has a dropdown menu with 'Main-MI' selected. A red arrow points to the dropdown. Below the table, there is a sub-table with columns 'Warehouse', 'Description', and 'Branch'.

Stock	Warehouse	Part	Description
* <input checked="" type="checkbox"/>	"Main-MI" (dropdown)		
	Warehouse	Description	Branch
	"Main-FL"	"Main-FL"	FL
	"Main-MI"	Main-Michigan	MI
	"Main-OH"	Main-Ohio	OH
