

# Development - 5-26-2021: BoldNetWeb unable to remove on- test using quick remove function (v2.1.25)

12/29/2023 1:52 pm EST

## Issue Description:

When using the quick remove function, it is pulling the date in the wrong format due to their date format being DD/MM/YYYY.

### Repro-Steps:

- Add an on test using the quick function for 1 hour.
- Delete the On test using the trash icon, selecting OK and providing a reason. (It will work the first time)
- Add another on test using the quick for 1 hour.
- Delete the On test using the trash icon.
- See that the date range now says Invalid date - Invalid date
- Select OK and specify a reason.
- The On Test item will not be removed.

## Solution:

Bug #19086 - Fixed issue with oos dates displaying using country datetime picture and on-test removal via Customer.

## Apply Fix:

Install the hotfixed 19086-ontest-remove-fix-ManitouWeb\_setup.exe on appropriate MWC/BoldNetWeb IIS Servers. File(s) located here:

\\boldfiles\Release\Manitou\Release 2.1.0\Hotfixes\Bug-19086-on-test-remove-issue-alt-date-format-hotfix-for-2.1.25\
