

Development - 3-12-2021: Remove On-Test issue (v2.1.22/v2.1.23/v2.1.24)

01/02/2024 5:18 pm EST

Issue Description:

In MWC and BoldNet Web, attempting to delete an On-Test entry would result in failure if any other On-Test entries exist for a System Account that has no Address information.

Solution:

We made the necessary changes to allow users to work with and remove On-Test entries regardless of whether or not any other On-Test entry from this or another account with no Address (System Account) happens to exist.

Apply Fix:

- Install the ManitouWeb_Setup on MWC and BoldNet Web web servers.
