

How to use Octopus for SedonaWeb Endpoint

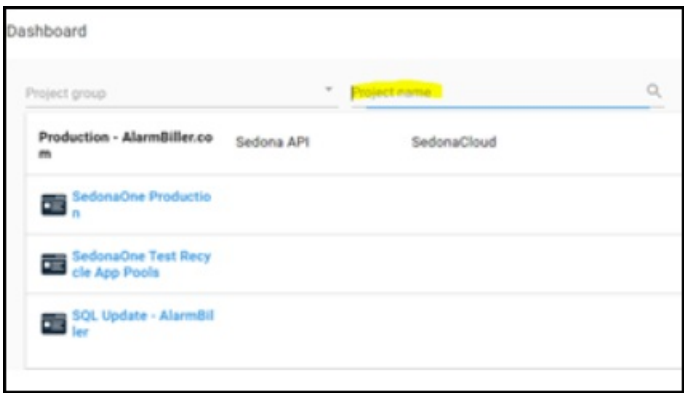

12/28/2023 3:45 pm EST

This would be used in the case that IT does not provide the endpoint or if this is an old project being reactivated

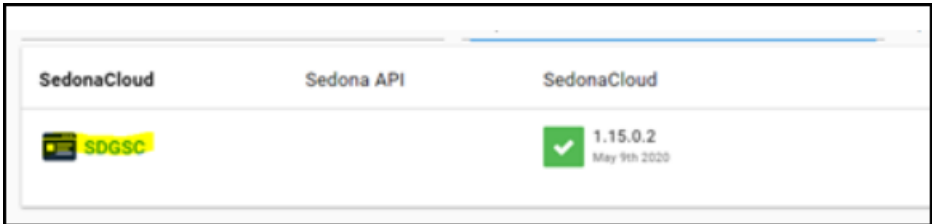

<http://alarmbillerdeployment.perennialsoftware.com:8080/octopus/app#/users/sign-in>

Step 1: Find Company

1. Search Company Name

2. Click on Instance Name

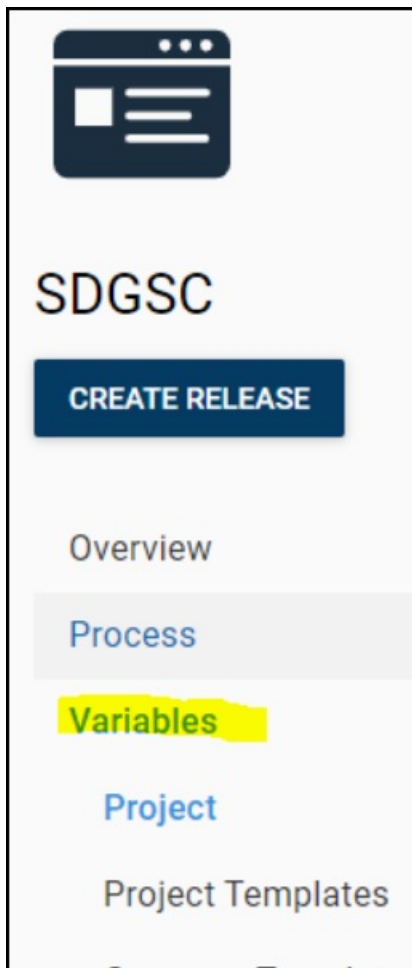

Step 2: Find Endpoint

1. Select the latest version

Release	Sedona API	SedonaCloud
1.15.0.2	DEPLOY	 1.15.0.2 May 9th 2020
1.13.1.1-Names	DEPLOY	 1.13.1.1-Names March 3rd 2020

2. Select Variables

Step 3: Obtain End Point

1. Copy the link from Congif: CookieDomain
