

How to Set Up SedonaWeb 2.0

12/21/2023 2:09 pm EST

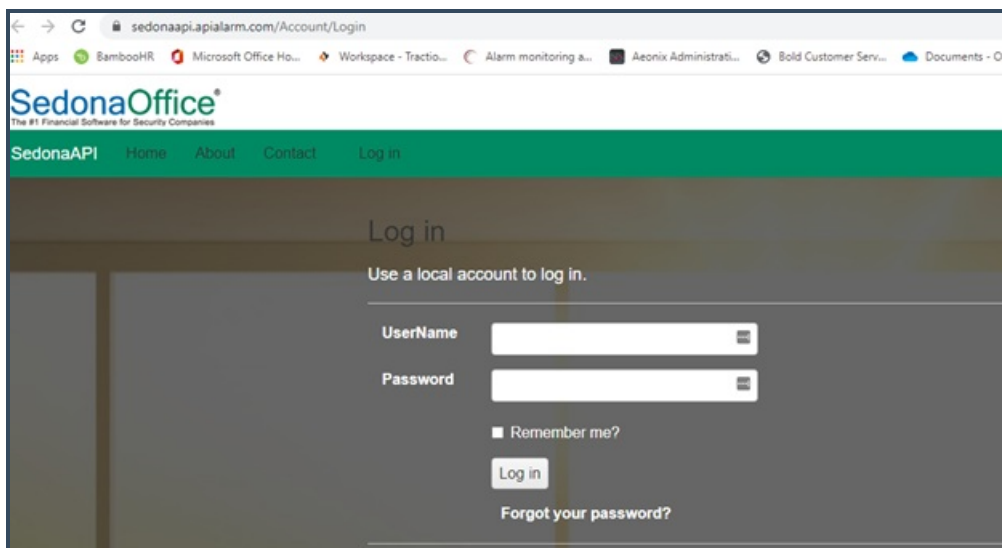

Important! Users must be on the latest version of SedonaOffice

Step 1: Receive Endpoint from IT/Octopus

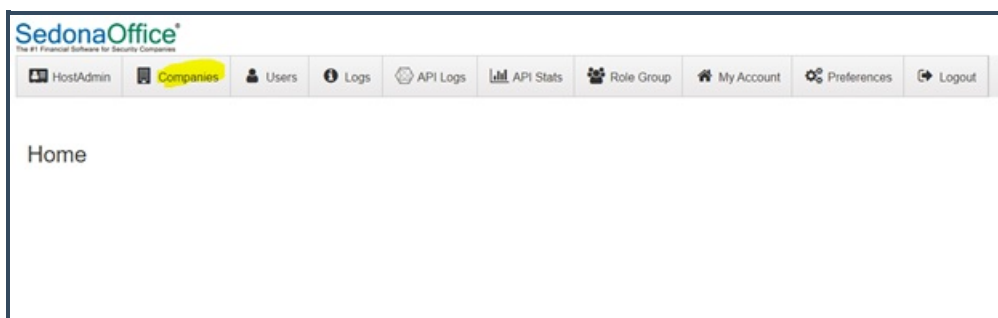

Log in as Hostadmin with the endpoint given by IT or Octopus

Example Endpoint: <https://sedonaapi.apialarm.com/Account/Login>

Step 2: Set up Company

1. Select Companies

2. Select Add Company on the top ribbon and then add the company

Id	Company Name	URL Prefix	OS/Version	Status	
1	a.p.i. Canada	ad	6.1.0.40	Active	<input type="checkbox"/>
2	API CANADA Sandbox	casa	6.1.0.40	Active	<input type="checkbox"/>

Step 3: Set up a Database

1. Ask the customer what database or databases they want to connect
2. Select the preferred database

Add Company

Company --Select--

Edit Connection String

Connection String

Options in dropdown: --Select--, Sandbox Canada Scott, Sandbox, a.p.i. US, API USA Sandbox
