

SIMS III Live Update Installation

12/28/2023 12:45 pm EST

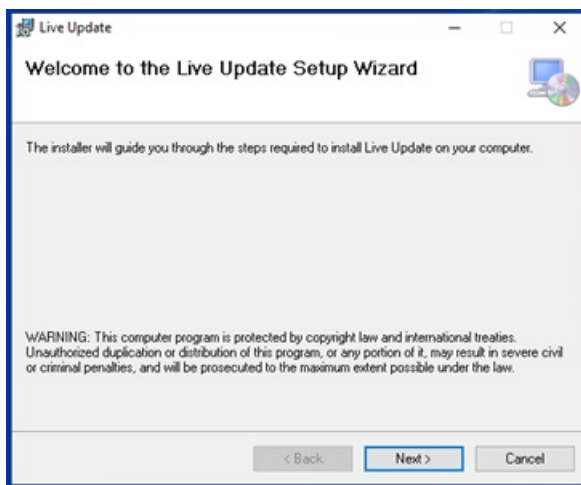

Pre-Requisites:

- All Windows Updates installed on computer
- Microsoft .net 4.7 or higher installed
- Automatic Windows updates disabled

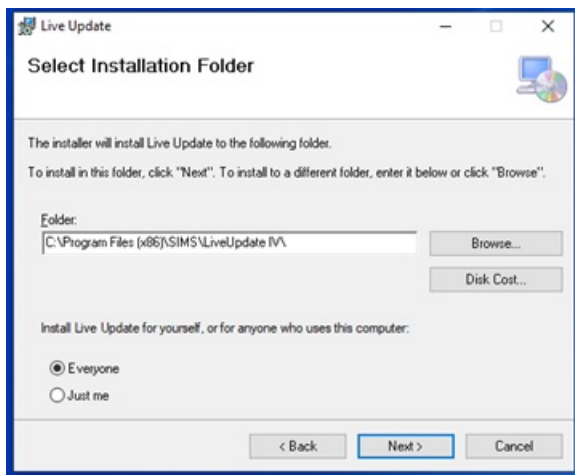

Installation Instructions:

****Computer needs to be logged in as an Administrator****

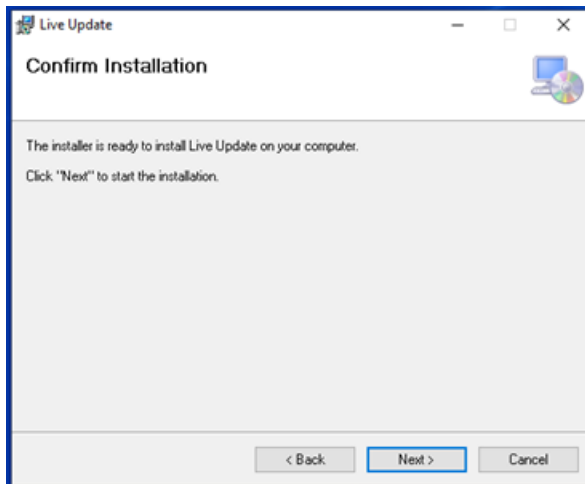

1. Transfer SIMS III Live Update executable to destination computer ([LiveUpdateSetup.msi](#))
2. Right click on LiveUpdateSetup.msi and click on Install
3. Installer will load and the Welcome to Live Update Setup Wizard will launch:

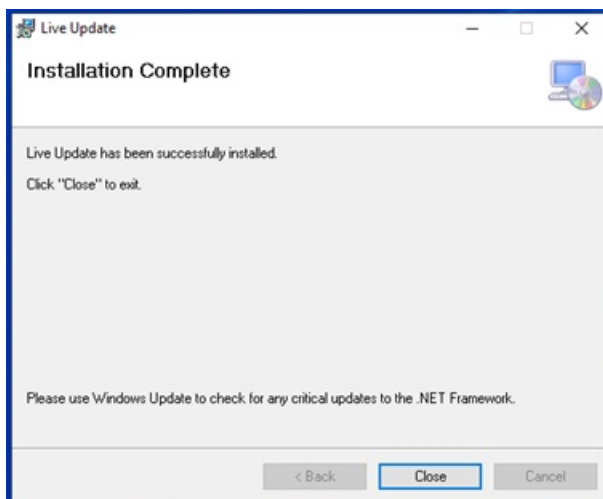

4. Click Next to get to the Select Installation Folder section (leave Folder to the default and choose if the product is to be installed for Everyone or just the installing user):

5. Click Next to get to the Confirm Installation section:

6. Click Next to install the Live Update files. Once the files have installed, then the Installation Complete section launches:

Click Close to close installer

****After installation, Live Update needs to be Set Program to Run as Administrator through Properties on the icon****
