

How to Fix REPQUEUE Max Test REPL Size

02/01/2024 5:11 pm EST

Description of Issue:

The following error is received while running a report:

Fixes:

Run this script on the Manitou db, need to run the reconfigure of the max text repl size in the primary and standby database(s).

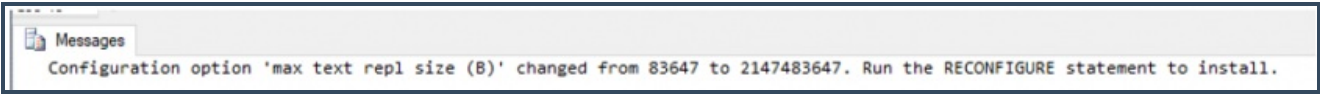

This will give you the current size

```
sp_configure 'max text repl size'
```

	name	minimum	maximum	config_value	run_value
1	max text repl size (B)	-1	2147483647	83647	83647

This will set the new value

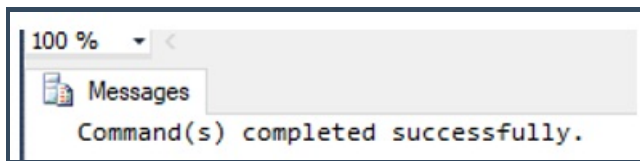

```
sp_configure 'max test repl size'.2147483647
```

This will set the current run value

```
reconfigure
```

go

Then check the value to ensure that it is set

sp_configure 'max text repl size'

	name	minimum	maximum	config_value	run_value
1	max text repl size (B)	-1	2147483647	2147483647	2147483647

Script to Use:

```
/* FIX MAX TEXT REPL SIZE SCRIPT */
```

```
-- This will give you the current size
```

```
sp_configure 'max text repl size'
```

```
-- This will set the new value
```

```
sp_configure 'max text repl size', 2147483647
```

```
-- This will set the current run value
```

```
reconfigure
```

```
go
```

```
-- Then check the value to ensure that it is set
```

```
sp_configure 'max text repl size'
```
