

Manitou - TCP and UDP Port Information

01/04/2024 4:45 pm EST

These ports are for Manitou and its associated peripherals. It is recommended to have the firewall on for any Manitou servers.

IMPORTANT! Do not add firewall port rules for all applications! Only specify ports for the applications that will be in use.

Copy-Paste Port List

Use the following as a copy to quickly grab the ports needed on a multi-server Manitou Core installation. This does not include add-ons such as the MediaGateway and BoldNet. Copy this information directly into a new inbound firewall rule to allow the connection.

TCP Ports

1433, 6980, 6990-6993, 6996-7001, 7007, 7008, 7010, 7020, 7021

UDP Ports

1434

TCP Ports

Port	Service	Notes
1433	MSSQL Server	Open for all servers leveraging any of the SQL Databases
6110	Telephony, PBX*	Default for Telephony and PBX communications
6112	MediaGateway FEP*	MediaGateway's connection to the FEP
6114	MediaGateway GPS*	MediaGateway uses this to send translated GPS to the FEP
6962	VRT	Voice Record, must be open for use
6980	Logger	Must remain open on the Manitou server for Logger to collect data
6981	All Events Printer	AEPrinter applications, leave open on server where AEPrinter is installed
6990	Application Server	Applications Server Communications

6991	Broker	Broker Communications
6992	Sentry	Sentry communication
6993	FEP Control	FEP signal reception, open on servers where a FEP is housed
6996	Report Server	Allows reports to flow to publisher
6997	Report Scheduler	Reports Scheduler communications
6998	Report Publisher	Reports Publisher communications
6999	Monitor	Open on all servers with ANY Manitou service
7000	Marshaller FEP	Mashaller services, open on servers with Marshaller installed
7001	Marshaller Signal Processing	Marshaller signal handling, open on servers with Marshaller installed
7007	Distributor	Distributor Services, Open on all servers with ANY Manitou service
7008	Web Gateway	BoldNET and Manitou Web Client communications
7010	Licensing*	Open on all servers with ANY Manitou service
7020	Local Utility Service	This is a local port and does not need a firewall rule!
7021	Local Utility Service	This is a local port and does not need a firewall rule!
7022	VCC	This is a local port and does not need a firewall rule!

*Port can be customized/changed

UDP Ports

Port	Service	Notes
1434	MS SQL Server	SQL Listener, clients can query for named SQL Instances
6982	Stealth Logger	
6981	All Events Printer - Stealth	Port Signal Handler uses to transmit AEP Data to Stealth
