

Manitou Core - Upgrading the Manitou Integration Check - Sedona Server for 2.0 Compatibility

12/29/2023 12:22 pm EST

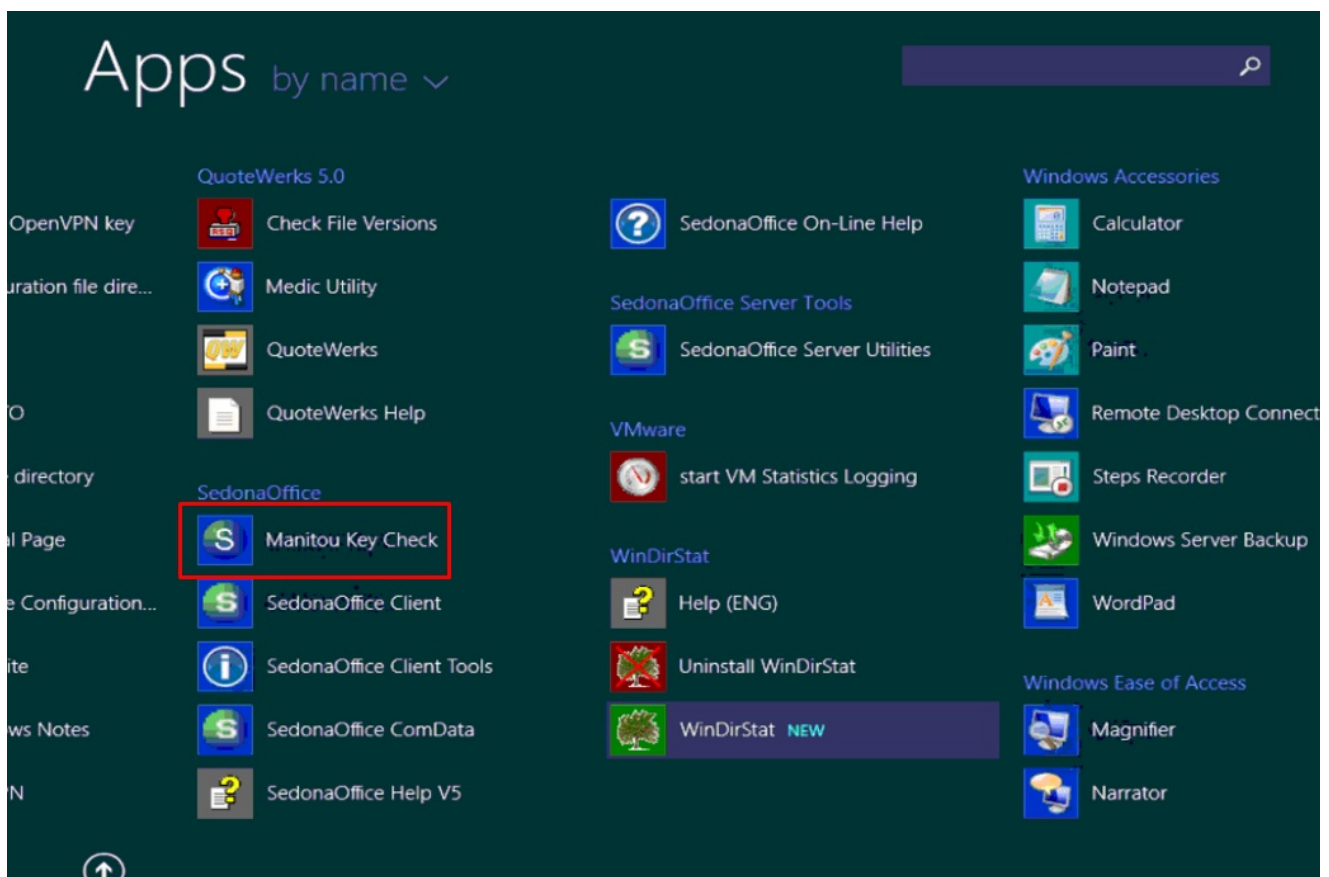

You will need access to the Sedona server to upgrade the Manitou Integration Check. The customer should have this information available for you prior to connecting.

Download the files

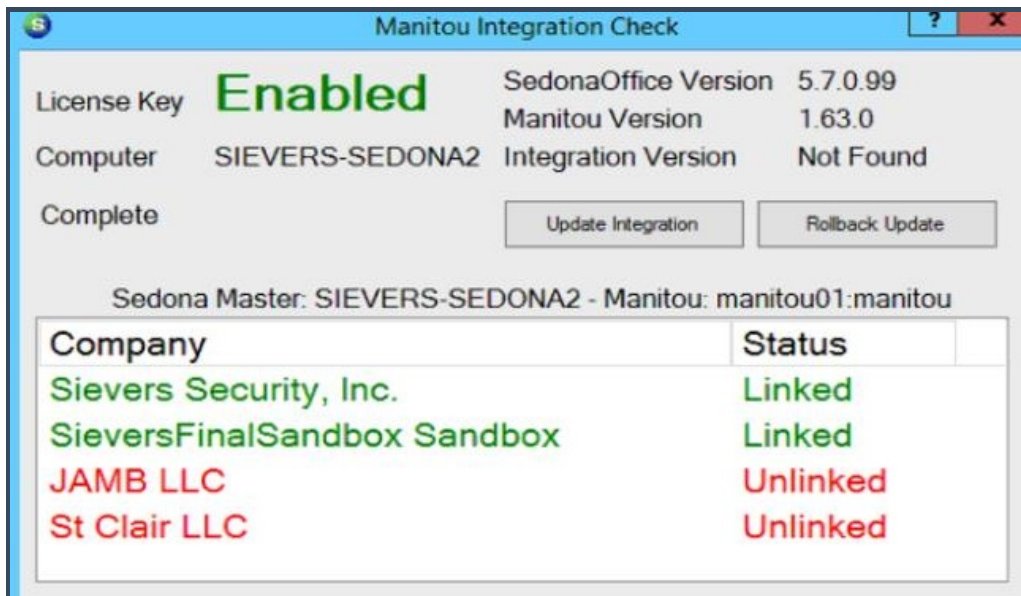

- You can download the files needed here:
<https://support.boldgroup.com/media/private/Sedona2.0.0Compatibilityfix.zip>
- Unblock and Unzip the file and place it on the desktop

Upgrading the Sedona Manitou Integration Check

- RDP into the Sedona server
- Click start and search for the Manitou Key Check program and Right click it and Run as Admin.

- You should see a screen that looks like this

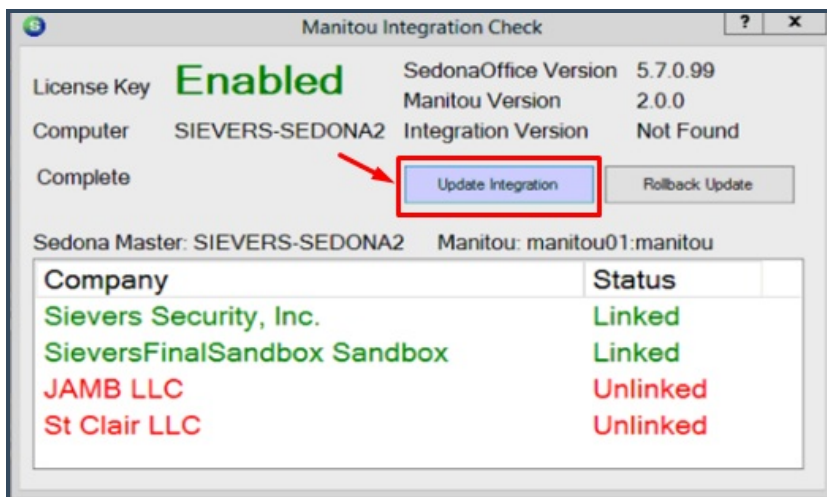

- To update the Manitou integration files click the "Update Integration" button. This will pull the needed integration files from our secure website.

If an error about the Manitou Version not being compatible is received, then continue to the manual upgrade steps below.

Manually upgrading the Manitou Integration Check

- If the method above failed, you can use local files by hold the Alt key while clicking the "Update Integration" button. This will allow you to navigate to where the file you placed on the desktop is stored.

- Make sure you use the 200 files in the local files directory:

Name	Date modified	Type
161	9/24/2019 6:27 PM	File folder
162	9/24/2019 6:27 PM	File folder
163	9/24/2019 6:27 PM	File folder
164	9/24/2019 6:27 PM	File folder
200	9/24/2019 6:27 PM	File folder
210	9/24/2019 6:27 PM	File folder

- Once the upgrade is complete verify the Manitou Version and Integration version have been updated
