

Starting and Stopping in the MSM

01/10/2024 12:44 pm EST

Locate the service within the Manitou System Manager (MSM) then right click it and select:

- Start – starts the one service.
- Start All – starts all “child” services underneath the service.
- Start All Extended – Rebuilds statistics for the dealer and company. (Please note this will take longer to restart the services beneath them, HOWEVER, it does rebuild their statistics which can be important and worthwhile, so please check with the customer to see if they can afford the time if the restart is not an emergency.)
- Stop – stops the selected service. Please be aware if the service is a parent service, all children beneath it will stop as well. Such as, if you Stop the Broker, all services underneath the broker will stop as well.
- Stop All – Stops that service and all the “child” services underneath the service.
- Properties – Displays the service settings.
