Create & Setup MSSQL Account

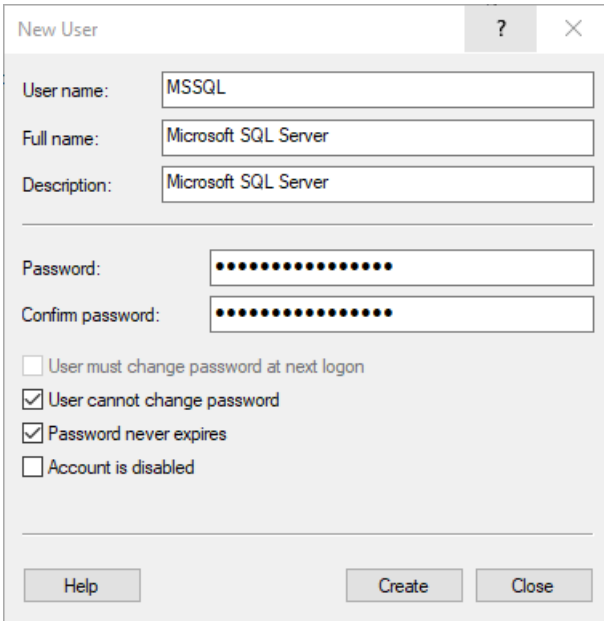

Before Manitou or SQL can be installed, the MSSQL Account must be created on any machine that will house a SQL Database related to Manitou. Follow this process to set up the account and provision it correctly.

Creating the MSSQL Account

1. Open a run dialog and run lusrmgr.msc

- 2.
3. Open the Users folder and then right click within the user listing to select "New User..."
4. Create a MSSQL Username with the name and description of "Microsoft SQL Server"
5. Create a strong password for the account, recording it in the CRM under the name MSSQL.
6. Uncheck "User must change password at next logon"
7. Check "User cannot change password"
8. Check "Password never expires"

9. 

10. Select Create

11. Right-click on the created MSSQL user and select Properties.

12. Select the Member Of tab and then select Add...

13. Type in Administrators and select OK.

14. Select OK to close the MSSQL Properties window and close out of the lusrmgr application.
