

Manitou Core - MWC Setup for Launching SedonaOffice Client

05/24/2024 8:09 am EDT

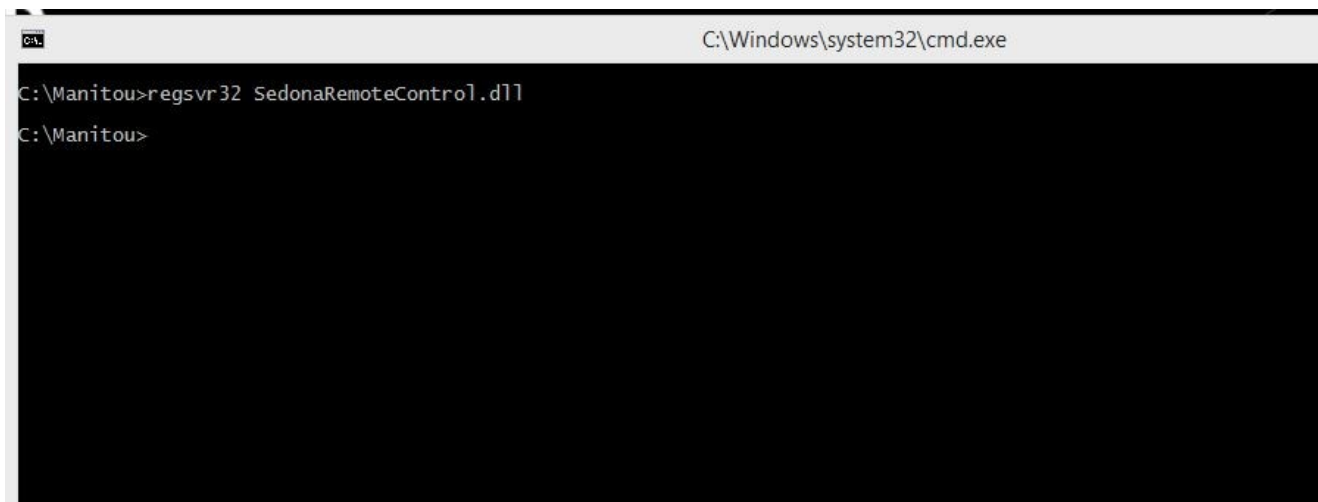

Manitou Setup

Make sure these DLLs are registered in the system running MWC. The DLLs need to be registered in the following order:

1. SedonaRemoteControl.dll
2. SedonaValidate.dll
3. Interop.SedonaRemoteControl.dll

To Install DLLs:

1. Open a Command Prompt shell as an Administrator.
2. Navigate to the directory where the dlls exist.
3. Type: regsvr32 <filename> where <filename> is the name of the dll you are registering

A screenshot of a Windows Command Prompt window. The title bar at the top reads "C:\Windows\system32\cmd.exe". The command prompt shows the current directory as "C:\Manitou" and the command "regsvr32 SedonaRemoteControl.dll" has been entered and executed. The prompt is now waiting for the next command.

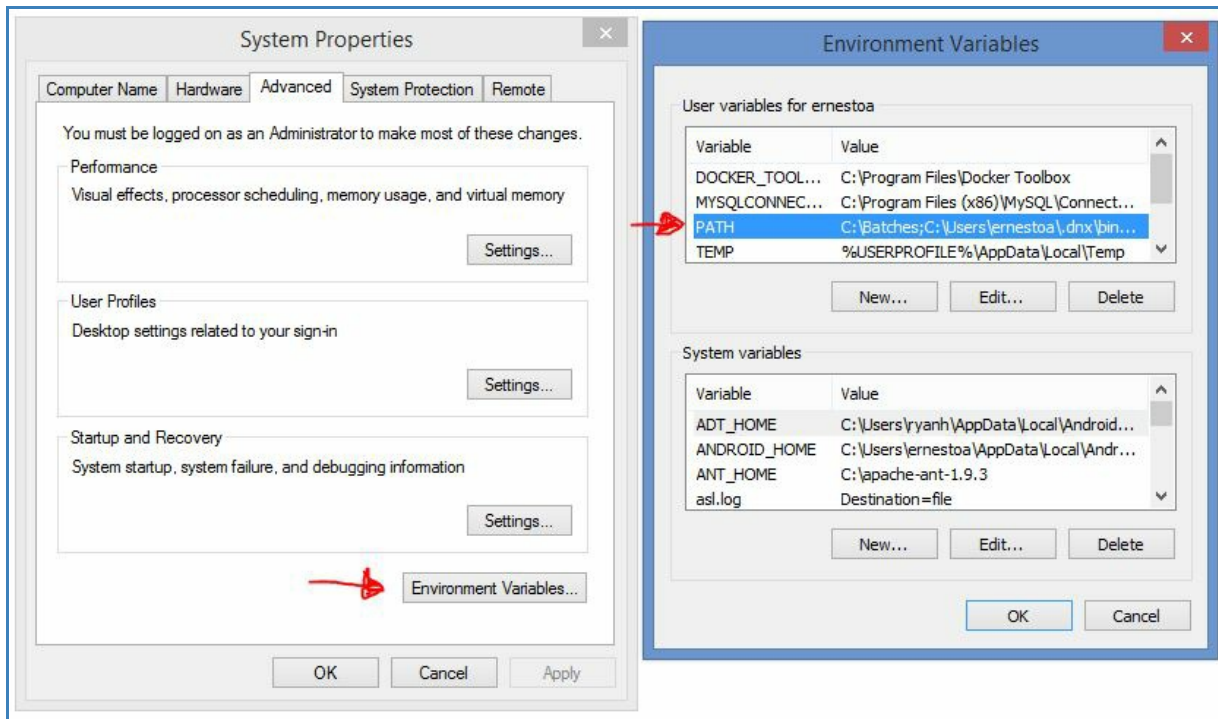

```
C:\Windows\system32\cmd.exe
C:\Manitou>regsvr32 SedonaRemoteControl.dll
C:\Manitou>
```

4. Repeat step 3 for SedonaValidate.dll and Interop.SedonaRemoteControl.dll

AppLauncher Setup

1. Go to Control Panel and click on Systems
2. Click on Advanced System Settings to see the System Properties Dialog

3. Click on Environment Variables and find the PATH variable in the User Variables area and click Edit.

4. Add a semicolon and type the directory path of the AppLauncher.exe into the PATH value.
