

Manitou Core - SQL Query - Select the Alarm Queue via Query

01/02/2024 6:22 pm EST

This query is for selecting the alarm queue in the same manner the default alarm queue presents in OWS. This can be used for setting up an excel alarm queue reader for expanding a filter past 1000 rows.

```
SELECT
MANITOU..ALARM.ALMTIME,
MANITOU..ALARM.PRIORITY,
MANITOU..ALARM.CUSTID,
MANITOU..CONTACT.FULLNAME,
MANITOU..ALARM.STCODE,
MANITOU..ALARM.EVNAME,
MANITOU..ALARM.AREA,
MANITOU..ALARM.ZONE,
MANITOU..ALARM.USRID,
MANITOU..ALARM.STATUS,
MANITOU..ALARM.SUSTIME,
MANITOU..ALARM.RLDES,
MANITOU..ALARM.TXID,
MANITOU..ALARM.INSTID,
MANITOU..ALARM.POINTID
FROM MANITOU..ALARM
INNER JOIN CONTACT ON ALARM.CUSTID = CONTACT.CONTID WHERE CONTTYPE = 1
```
