

Manitou Core - SQL Query - Adding the MSSQL User and Create SNAPSHOT directory

01/02/2024 6:17 pm EST

This script will add the MSSQL user and create the SNAPSHOT directory.

```
echo 'Type in the MSSQL password you would like to set'; $wshell= New-Object -ComObject Wscript.Shell ; $wshell.Popup("Type in the MSSQL password you would like to set")

$Password = Read-Host -AsSecureString

echo 'MSSQL Password set!'; $wshell= New-Object -ComObject Wscript.Shell ; $wshell.Popup("MSSQL Password set!")

New-LocalUser "MSSQL" -Password $password -FullName "SQL Replication Account" -Description "DO NOT DELETE, USED WITH REPLICATION"

Add-LocalGroupMember -Group "Administrators" -Member "MSSQL"

echo 'MSSQL user created!'; $wshell= New-Object -ComObject Wscript.Shell ; $wshell.Popup("MSSQL user created!")

New-Item "C:\SNAPSHOT" -type directory
New-SMBShare -Name "SNAPSHOT" -Description "SQL Replication Snapshot" -Path "C:\SNAPSHOT"
Grant-SmbShareAccess -Name SNAPSHOT -AccountName MSSQL -AccessRight FULL

echo 'SNAPSHOT directory created and shared with MSSQL user'; $wshell= New-Object -ComObject Wscript.Shell ; $wshell.Popup("SNAPSHOT directory created and shared with MSSQL user")
```
