

Installation Prerequisites

01/10/2024 12:38 pm EST

Before starting the Manitou Core installation, please verify all of the following are in place. All exceptions to this will need to be recorded in the CRM for the project.

Manitou Core Prerequisites

- MSSQL Account Created
- Google Chrome Browser
- Windows Updates Completed
- Installer files are copied to the machine NOTE: UL Approved installations require ALL Installer Files to remain AFTER Installation is complete
 - Manitou Client Files
 - SQL Database Install Files
- Windows Features Enabled
 - Windows Faxing Service
