

How to create a new VP2 Registration Key

12/28/2023 1:18 pm EST

1. Go to U:\vpwin\VPKEY.EXE
2. Pick the serial no (it should autload the Company Name, Port, if they are UL)
3. Set an expiration date of 6/1/2050.
4. Make sure the Dongle type is Old Style.
5. Enter the reason (i.e. changing computers).
6. Click on Create Key.
7. If successful, the following window should pop up.

This registration key is for a 32 bit computer. To update it to be used on a 64 bit computer, you will go to U:\VPWIN\KEY\VPNNNN.REG (where NNNN is the serial no). Right click and Edit.

[HKEY_LOCAL_MACHINE\SOFTWARE\SIMS\SIMS VaporPaper\Site] (this is the current information) and needs to be changed to:

[HKEY_LOCAL_MACHINE\SOFTWARE\WOW6432Node\SIMS\SIMS VaporPaper\Site], then save as VPNNNN-64bit.REG.
