

# Template for development documentation (new product)

12/29/2023 4:32 pm EST

## Menu Path

Where to find the feature/screen in the software

## Overview

Brief description of the screen/feature. What does it do? Why would someone use it?

## Prerequisites/Dependencies

What needs to be done before using this screen/feature. What does this screen/feature depend on?

## User Rights/Roles

Do users need any specific rights or roles to use this feature?

## Database

Where is the data for the feature stored?

## Fields

| Field | Required | Size   | Type                               | Default        | Description       |
|-------|----------|--------|------------------------------------|----------------|-------------------|
| name  | Yes/No   | 1 to ? | Alphanumeric Numeric List Checkbox | if any or None | short description |

## Transaction Types

If this a feature/transaction screen, description of the transaction created.

## Integration Points

After saving data on the screen, where else is the data used?  
(Good place for a flowchart)

## Troubleshooting

What can go wrong & How to correct it

(Troubleshooting chart)

|                                                                                                       |
|-------------------------------------------------------------------------------------------------------|
| <b>Private/Confidential</b>                                                                           |
