Enhancements/Features

35296 | Allow deleting of SO Sites in Sales Automation

Adjusted the Sales Automation rejected proposal workflow so if only the SedonaOffice site is deleted but not the complete SedonaOffice customer, Sales Automation will attempt to make inactive the Sales Automation customer site and customer system attached to the rejected Sales Automation proposal. (Note: This requires SedonaWeb2.0 version 1.43.1.2 for change 35295 - Update API to allow Sites to be deleted.)

Corrected Bugs (Application Corrections)

None for this release.

Special Upgrade/Installation Instructions

None

Supported Environments
