

SedonaAPI and SedonaWeb 2.0 - 1.25.1

01/05/2024 11:41 am EST

Special Upgrade / Install Instructions

If your company uses the SedonaCloud API, IT will update the SedonaCloud version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with the all modules utilizing SedonaCloud.

Supported Environments

Version Support

** This version of SedonaCloud requires SedonaOffice version 6.1.0.55 or above **

Minimum System Requirements:

- Server is on Microsoft .Net 4.6.1
-

Bugs

SedonaWeb 2.0 Registration Issues

Issue - Email and password confirmation can disable the submit button when registering

Solution - Ensure that when registering customers, the email and password confirmation do not inhibit the ability to submit the registration

SedonaCloud Documents Error

Issue - When trying to pull documents via SedonaCloud, an error is produced, preventing the document from being pulled successfully

Solution - We need to ensure that the image files are stored correctly so they can successfully be pulled via SedonaCloud
