

SedonaAPI and SedonaWeb 2.0 - 1.26.0.1 - 3/17/2021

01/05/2024 11:42 am EST

Special Upgrade / Install Instructions

If your company uses the SedonaCloud API, IT will update the SedonaCloud version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with the all modules utilizing SedonaCloud.

Supported Environments

Version Support

** This version of SedonaCloud requires SedonaOffice version 6.1.0.55 or above **

Minimum System Requirements:

- Server is on Microsoft .Net 4.6.1
-

Bugs

SedonaWeb Logins do not carry over to SedonaWeb 2.0 (16781)

Issue - User Passwords do not transfer from SedonaWeb to SedonaWeb 2.0

Solution - Modified the Forgot Password functionality to reset the SedonaWeb user password, if that user has forgotten it, by using their SedonaWeb username and Customer Number. This will convert that user to a SedonaWeb2.0 user. Modified the login process for users who remember their SedonaWeb username and password by adding a prompt to change their password and convert the user to a SedonaWeb 2.0 user.
