

Find SY_Users Records with Specific Access Right

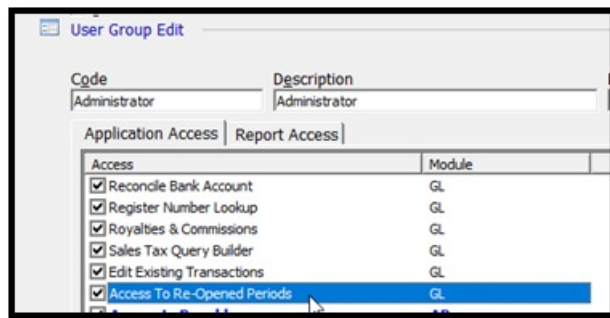

04/29/2024 9:49 am EDT

Description of Issue:

How can we find the user groups and users who have access to a specific access right in SedonaOffice?

Resolution:

The script below can be used to determine the Users and User Groups that have access to a specific access right in SedonaOffice.

```
DECLARE @Menu_Option AS VARCHAR(100)

--- Enter all or part of the Application Access Description.
--- Leave the % at the beginning and end of the description.

SET @Menu_Option = '%Re-Opened Periods%'

Select g.Description as User_Group,m.Description as Access_Option, u.*
From SY_User_Group_Acc_Detail d
Inner Join SY_User_Group g on g.User_Group_Id =d.User_Group_Id
Inner Join SS_Menu m on m.Menu_Id =d.Menu_Id
Inner Join SY_User_Group_Join j on j.User_Group_Id=g.User_Group_Id
Inner Join SY_Users u on u.User_Id = j.User_Id
Where m.Description like @Menu_Option
and u.Inactive<>'Y'
Order by User_Group
```
