

Error When Importing Job from WeSuite to Sedona Office – Invalid Object Name ‘acc_CostCategoryMapping.’

04/29/2024 9:48 am EDT

Sedona Office Job Queue – WeSuite Jobs

If you receive the Error Message: Invalid Object Name ‘acc_CostCategoryMapping’ when creating a Job in Sedona Office that was imported from WeSuite, the Job Details will not be imported.

This is caused by the version of WeEstimate the Customer is on which does not contain the Job Costing Tables that were added in Sedona Office in version 6.2.0.5.5.

The Customer will need to contact WeSuite to either have the Job Costing Tables added to WeEstimate or update to a more recent version of WeEstimate.
