

How to Update Shipping Methods for ADI Integration

04/29/2024 10:37 am EDT

Description of Issue:

Shipping methods are entered into SedonaSetup > Shipping Methods but they are not appearing in certain vendors.

Resolution:

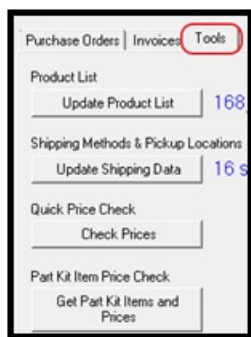

Go to the Purchase Order option from the Accounts Payable option in the company tree.

There is a button that says ADI on the Bottom Right corner area of the Purchase Order List window.

Click the ADI button and go to the Tools tab at the top of the ADI Integration window.

There is an option called Update Shipping Data. It should give you a number of shipping methods and pickup locations.

Click the Update Shipping Data button and it should update the Shipping Methods and Pickup Locations.

Purchase Orders | Invoices | Tools |

Product List

Update Product List 168,199 products on file.

Shipping Methods & Pickup Locations

Update Shipping Data 16 shipping methods - 50 pickup locations

Quick Price Check

Check Prices

Part Kit Item Price Check

Get Part Kit Items and Prices

It shows the number of shipping methods and pickup locations.

Note: If the amount does not update when the Update Shipping Data button is clicked or if you are not seeing the methods in your dropdown list when creating a Purchase Order then the customer may not have entered their ADI prefixes correctly, or they may need ADI to assign the shipping method they need to one of their prefixes.
