

Scripts to remove Line Feeds or Carriage Returns in the IN_Part Table

04/29/2024 10:49 am EDT

Description of Issue:

If Part codes, Descriptions, or other text fields contain line feeds or carriage returns in the field, it can cause problems in the application.

Resolution:

The scripts below can be used to remove these from the fields in the IN_Part table.

--- Backup Table before making changes. ---

```
select * INTO IN_PART_backup12345 from IN_Part
