

Where is the API documentation for SedonaAPI 2.0

02/08/2024 6:44 pm EST

Issue:

Where can a user see the documentation related to the API endpoints and all resources available for SedonaAPI 2.0?

Resolution:

If a customer has SedonaCloud, they can access the Swagger Documentation for the APIs on their site.

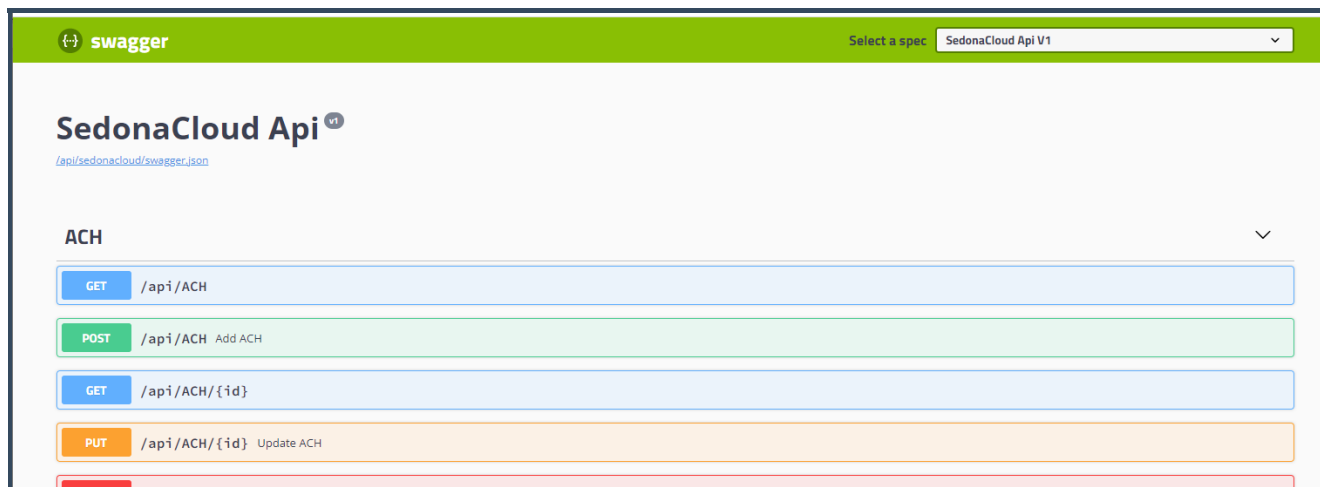

Open the Homepage in a browser and click About.

□

When the About page opens, Click the link for Documentation.

▣

This will open the Swagger documentation with all the available resources.

If the customer does not yet have their own site and would like to see the documentation, it can be viewed on the test site at the link below.
