

# FSU Quick Notes/Issues and Fixes

02/12/2024 8:48 am EST

Automatically check "Make Available for FSU" = cannot do on the front end, can set up a job:

```
UPDATE IN_Part SET Service_Part = 'Y' WHERE Part_Id > 1 AND Inactive = 'N'
```

Note: Enabling many parts can cause the FSU app to load slowly as it tries to load all the parts. Can set to only load parts monthly instead of every time if load time is an issue.

The user cannot log in but we can, possibly wrong password lockout, unlock, give them credentials, check.

**FSU port = UDP 1194**

FSU management site cannot use customer IDs with a "-". Need to have a new customer account made for FSUs.

FSU tech can log in after the server move but no scheduled appointments show up or any other data - rerun FSU scripts, stored proc lost in translation somehow, or Bob magic voodoo missing.
