

Sandbox Wizard

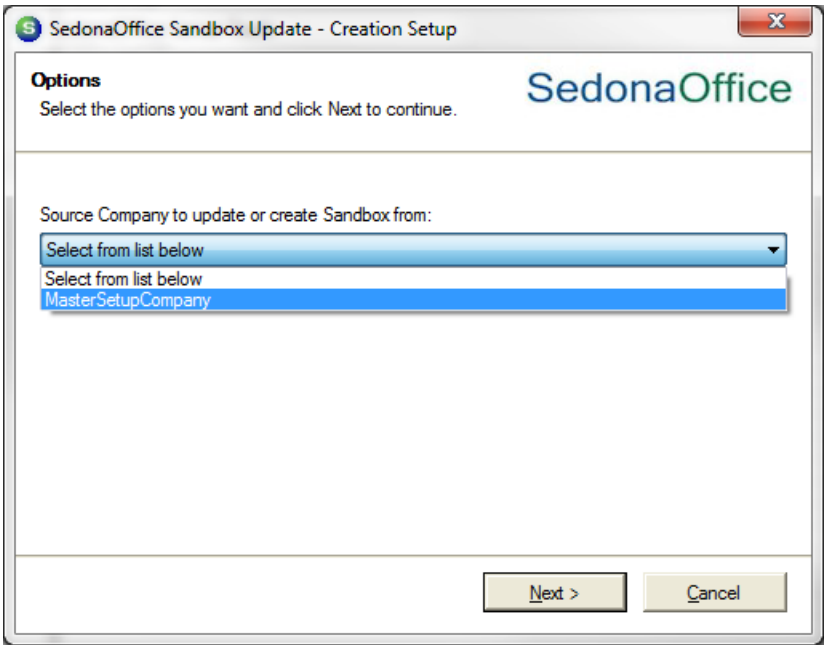

02/12/2024 12:52 pm EST

Connect to your SedonaOffice SQL server and locate the SedonaOffice Server Tools located in the Windows start

menu.

Select the **Sandbox Wizard** and choose Open.

Drop down the list and select the database you are making the sandbox from. This is typically your Final database. Press **Next**.

S SedonaOffice Sandbox Update - Creation

Verify Database Path
Click Next to update or create a Sandbox test company.

Create or Update Sandbox from:
MasterSetupCompany

Path to Sandbox Database:
C:\Program Files\Microsoft SQL Server\MSSQL10_50.MSSQLSERVER\MSSQL\DATA\ ...

Name of Sandbox Database:
Sandbox

< Back Next > Cancel

Generally, you would leave the settings on this screen as default. Select **Next**.

S SedonaOffice Sandbox Update - Creation Setup

Backup and restore in progress
Please wait...

This may take a while depending on the size of your source database...

Removing temp files

Progress bar: [80% full]

Cancel

Wait for the wizard to complete.

Select **Finish**.

Test the sandbox by logging into it now.
