

CredSSP Fix

02/12/2024 4:05 pm EST

CredSSP is a 'Windows' issue and easy to fix, have the customer:

1. Open the command prompt (run CMD) or Powershell.

2. Paste: `REG ADD HKLM\Software\Microsoft\Windows\CurrentVersion\Policies\System\CredSSP\Parameters\ /v AllowEncryptionOracle /t REG_DWORD /d 2 .`

3. Hit enter.

4. If successful try to open SedonaOffice.
