

Moving to new Manitou and Sedona Servers

02/13/2024 9:05 am EST

You will need to make adjustments to the Integration Setup page in your SedonaSetup. Simply update the bold server and alternate server names and update the credentials and SQL user credentials that Bold provides you. I would assume those will stay the same, but it's always good to check.

May need to run integration tool if also updating, see wizard how-to

Server.net.dll
