

Sync filling up temp folder

02/13/2024 9:32 am EST

Events apparently use temp files for each individual trigger so an event triggering absurd amounts of times can get stuck filling up C:\ drive. Ex. 53000 unprinted invoices in print queue being processed by OPT's invoices in print queue.

Select distinct E-Mail from AR_Customer_Bill where E-Mail <> ''

Cancelled account status id = 3?
