```
AR_Invoice.Customer_Bill_ID = AR_Customer_Bill.Customer_Bill_ID
```

Merge cells on email grid: colspan, ex: `<td class="tg-1asm" colspan="7">{BillTo}</td>`

```
sp_addlinkedsvlogin 'KnightSecurity', 'FALSE', 'SedonaSync', 'KnightSedonaSync', 'SedonaSync20!7'
```

Action was cancelled by an associated object

Let's see how this works:

- RE61005-XX-X - (K) drops below 15 in the Totowa Warehouse
- RE61055-XX-X -(K) drops below 10 in the Bridgeport Warehouse
- RE601 - (K) drops below 45 in the Totowa Warehouse
- RE601 - (K) drops below 30 in the Bridgeport Warehouse

Is this how it works?
