

# SedonaAPI Installed

02/13/2024 11:51 am EST

We have finished the installation of SedonaAPI.

SedonaAPI Documentation can be found on the sedonaAPI site.

First you can go to the site (<https://sedonaapi.jmgsecurity.com>)

Click on SedonaAPI and then click on Documentation.

## About the SedonaAPI

The SedonaAPI provides a set of RESTful web services for enabling secure bidirectional communication between the SedonaOffice environment and your front-end applications (web portals, CRMs, client apps, etc.). Benefits include:

- Ability to view, create and update records such as Customers, Sites, Systems, Recurring, Invoices, Payments, Credits, Vendor Bills/Checks and more.
- Real-time access to customer and vendor information from anywhere.
- Reduce data entry errors through tighter integration between systems.
- Save time and money streamlining your data processes.
- Customizable to meet your needs.

For a complete list of the resources provided, click on [Documentation](#).

[Contact us](#) today to learn more about how the SedonaAPI can help your business move forward.
