

SedonaCloud Install

02/13/2024 11:56 am EST

Your SedonaCloud API has been set up. See details and documentation on getting started with generating access tokens below.

URL:

ClientID: SedonaCloudClient

ClientSecret:

Host Admin login (to set up company databases, users, and other preferences):

Username:

Password:

Feel free to change the host admin login via preferences. Just note that our AlarmBiller team may need this information for setup of modules such as Sales Automation or eForms. Also note that the host admin login cannot generate access tokens, you would need to set up a company and company user to start doing so.
