

# Host license

02/13/2024 12:25 pm EST

The host license comes from the going to Preferences=> License. Copy that and paste it in there (this will be happening automatically in the future). The URL Prefix is the company, or tenant name. I can be whatever you want, but I would name it after the company, either permar or Midwest. e.g.

## Example:

<https://permar.sedonacloud.com> or <https://midwest.sedonacloud.com> (if you're using subdomains)

<https://sedonacloud.com/permar> or <https://sedonacloud.com/midwest>
