

# Auto-Aging

02/14/2024 10:04 am EST

- In SQL Manager on SQL server, under SQL Agent, under jobs, Auto-Aging.
- Add, put in Company name and db
- Go to Autoaging (doubleclick and look at steps)
- Copy Command from another step:
- Exec All\_Customer\_Aging
- Then need to move and change advanced settings to make job continue to next step
