

Copy eForms Templates Across Databases

02/27/2024 11:56 am EST

Question: Can eForms templates be copied or transferred from one AlarmBiller database to another?

Answer: Unfortunately, at this time they cannot be copied or transferred from one AlarmBiller database to another. You can only copy an existing form within the database to modify it as a new template

(Do we have an article that can be linked to expand on this topic?)
