

How to Find Invoice Number Range in a Cycle Batch Using SQL

05/16/2024 6:24 pm EDT

This process will go through the steps to find the invoice number range in a specific cycle batch that has been completed. The steps were completed in SedonaOffice version 6.2.0.14.

OVERVIEW

When trying to find an invoice that was posted in a specific cycle batch the steps below will help in that process.

Steps:

1. Click on Accounts Receivable – Cycle Invoicing

□

2. Once the window opens, click on Show Posted Cycles

□

3. Look at the cycle batch(es) that the invoices may be located and notate the Cycle numbers. In our example: 428, 429, 430

□

4. Click on SQL to open the SQL Query Window

□

5. Type in the following SQL Command

Select * from AR_Cycle where Cycle_ID in (429,429,430) -- Enter or click on Green Arrow

□

6. The Results will fill in the bottom of the window. These will show the First – Last invoices numbers and the Post Count of each batch queried

□
