

How to add a Company to SedonaOffice in SedonaMaster Database

07/02/2024 5:15 pm EDT

If you need to add a company to SedonaOffice and front end tool is not working, you can add the company directly in the SedonaMaster database.

1. Open SedonaMaster database in object explorer and open tables.
 2. Right click Company > Edit Top 200 rows
-
3. Copy a previous line into the open edit box.
 4. Change the ComputerName in the new line to the SQL server where the database is located.
 5. Change the DataSource to the name of the database
 6. Change the Company name to the name you want the company you want to name.
 - a. Add Sandbox if the company needs to be a sandbox/test environment
