

Permissions Needed to Check Current Login Status

06/20/2024 5:41 pm EDT

AlarmBillr provides users with the necessary access (Administrators or User Administration permission) the ability to see if or who is currently logged into the software.

What are the necessary permissions to see if a user is currently logged into AlarmBillr?

The necessary permission to be able to see if users are logged into AlarmBillr are:

- 1. Administrator – This user role enables everything access related in AlarmBillr:

Edit User Account [Cancel] [Save]

Username:	R
First Name:	R
Middle Initial:	
Last Name:	M
Phone:	()
Email:	re .com
Time Zone:	(UTC-05:00) Eastern Time (US & Canada)
User Role:	Administrator
