

# How to Re-Start Sedona Sync v10.0

09/16/2024 5:35 pm EDT

When a customer's SedonaSync application stopped running, Someone will need to restart the services. This happens when the SQL server is re-started.

How to restart SedonaSync steps.

1. Open Services module
2. GO to SedonaSync Service and right click
3. After you right-click and see the options available choose RESTART, this will start your SedonaSync
