

Delete All Data in AlarmBiller and keep Setup Tables

02/03/2025 6:45 pm EST

When doing data imports for new customers, you will need to reset the database between each pass. In order to clear the old data, but keep the company setups you will need to use the script below on the customer data base:

```
--truncate TABLE dbo.aForteTransactionInvoice
```

```
--SELECT * FROM sdealer
```

```
BEGIN TRAN
```

```
UPDATE dbo.aWorkOrder
```

```
SET InvoiceId = NULL
```

```
UPDATE dbo.aInvoice
```

```
SET WorkOrderId = NULL
```

```
UPDATE dbo.aCalendarAppointment
```

```
SET WorkOrderAppointmentId = NULL
```

```
DELETE FROM dbo.aCustomerVisitedDetail
```

```
DELETE FROM dbo.aCustomerTerm
```

```
DELETE FROM dbo.cf_Recipient
```

```
DELETE FROM dbo.cf_InstanceStage
```

```
DELETE FROM dbo.cf_FormInstance
```

```
DELETE FROM dbo.cf_PackageInstance
```

```
DELETE FROM dbo.aCalendarTechnician
```

```
DELETE FROM aRmrGeneration
```

```
DELETE FROM aRmrBatch
```

```
DELETE FROM aRmrRateChange
```

```
DELETE FROM aGLEntryDetail
```

```
DELETE FROM aGLEntry
```
