

What permission will allow a User to see All tasks in Task Management

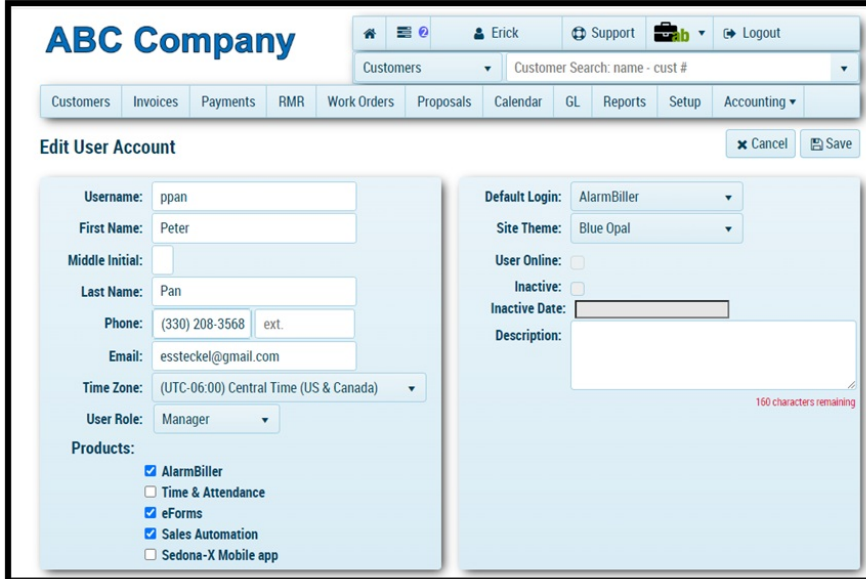

08/14/2024 9:04 am EDT

Dealer created a case asking what permission will allow a User to see All tasks. Follow these steps below to modify the Users account to allow them to see all tasks within Task Management

1. Click on Setup tab up top and then click Users

2. Click on the User Name in blue and then change the User Role to Manager and then click the Save button

3. The user will now be able to see all tasks within Task Management
