

What WeSuite Integration Is

09/13/2024 6:45 pm EDT

The intention of the WeSuite integration is to allow customers to setup quotes in WeSuite, and then import those into SedonaOffice as jobs and new customers (or new jobs for existing customers).

If a customer requests WeSuite integration they should be directed to sales.

If customers have questions about WeSuite itself they should be directed to WeSuite support. If you need WeSuite's help to resolve a customer's integration question you can also contact WeSuite support. Their email is wesupport@wesuite.com.

If customers have questions about the integration between WeSuite and SedonaOffice, support can assist.
