

WeSuite Setup Fields

09/13/2024 6:44 pm EDT

Located at the very top of Sedona under Tools – WeSuite. This should be completed by the time the customer reaches support, and support should not need to edit this.

The screenshot shows a window titled "WeSuite Integration" with a standard Windows title bar (minimize, maximize, close buttons). Inside the window, there are four text input fields arranged vertically. The first field is labeled "SQL Server Name" and contains the text "SQL2016". The second field is labeled "Database Name" and contains the text "contracts". The third field is labeled "User Id" and contains the text "weopp". The fourth field is labeled "Password" and contains several asterisks. At the bottom left of the window is a button labeled "Test Connection", and at the bottom right is a button labeled "Save".

Common WeSuite Questions –

- The WeSuite setup is missing – Check if WeSuite is installed on the machine (remember that if Sedona is on a remote machine that is also where wesuite needs to be). Does the customer have the integration? Do other machines have the button? Sedona and/or WeSuite may need to be reinstalled on the machine.
