

How to Find List of Transmitters Entered into the System Using Reporting

08/28/2024 12:32 pm EDT

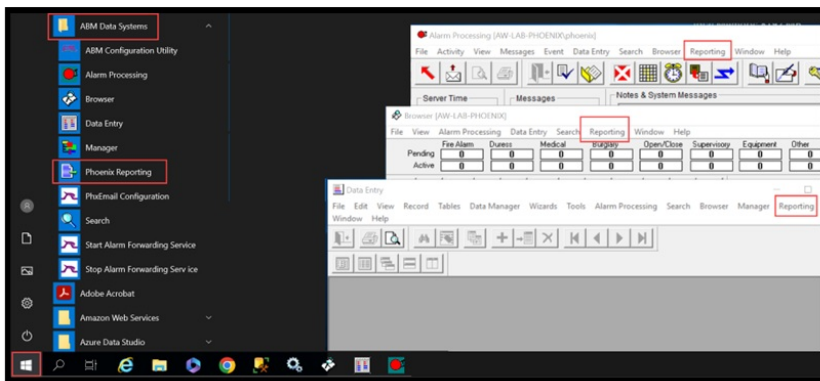

There will be times a list of transmitters is needed. This document goes over how to get that list using Phoenix Reporting. These steps can be used for any version of Phoenix.

Overview

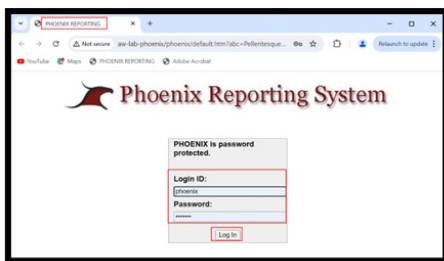

When performing the steps below, the document assumes the user has the correct permissions to do so.

Steps:

1. Phoenix Reporting can be opened in different areas. Alarm Processing, Browser, Data Entry or from the Windows.

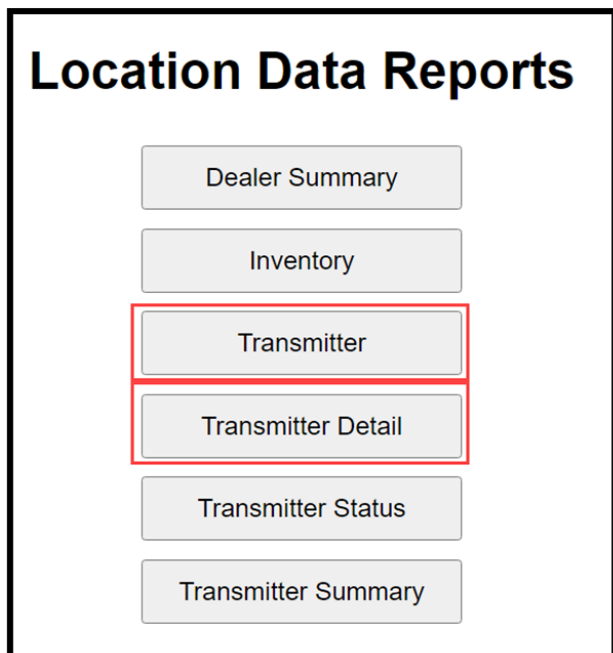

2. Click on one of the options – Log in using an appropriate user – Click Log In Button

3. Click on Location Data Button

4. Click on either the Transmitter Button – if only want a list of the transmitters in the system or Transmitter Detail Button – if need a list and details about the transmitter

5. Fill in the Title/Subtitle needed – Can run by any of the options, If want all do not fill in any fields – Can select how to sort the report – Can either print or email the report – Once all options selected, Click on Submit
