

Inserting Deposit Record into AR_Deposit from backup

09/12/2024 5:11 pm EDT

To recreate a Deposit Batch record from your backup you can use the script below. Please note that a valid deposit batch is necessary for an AR_Deposit_Check record to show up as a payment on a front end customer account

```
SET IDENTITY_INSERT AR_Deposit_Batch on
```

```
GO
```

```
INSERT INTO [dbo].[AR_Deposit_Batch]
```

```
    (Deposit_Batch_Id
```

```
        ,[Description]
```

```
        ,[Date]
```

```
        ,[Tape_Total]
```

```
        ,[Entered_Amount]
```

```
        ,[Memo]
```

```
        ,[Ready_To_Deposit]
```

```
        ,[Deposit_Id]
```

```
        ,[Check21_Batch]
```

```
        ,[Created_By]
```

```
        ,[Created_Timestamp]))
```

```
Select *
```

```
from BAK_ARDEPOSTITBATCH
```

```
where Deposit_Batch_ID = ''
```

```
SET IDENTITY_INSERT AR_Deposit_Batch on
```

```
GO
```
